

## **How to Renew Stamp 0**

A person who has been granted stamp 0 by INIS and whose residence permission letter from INIS states that this permission is renewable may make an application to INIS one month before expiry of the permission. The renewal application must include a full copy of your current passport and evidence of continuing medical insurance and finances.

If you are found to have breached the conditions of your permission renewal may be refused and you may be required to leave the State. The conditions attached to your residence permission will be contained in the original letter from INIS
